

Licence Protector - Update 2.3.2 Installation Instruction

The update programme needs a valid licence of Licence Protector **2.3.x**.

Installation Instruction

- ▶ Step 1: Select the installation directory of version 2.3.0 or 2.3.1. The updater checks the licence file on this directory
- ▶ Step 2: The programme version is installed. You are prompted for a directory. **Never install the version on the same directory as your old version** – it should always be installed on a new directory 2.3.2. Your old licence file is copied and updated. Do not manually copy the old licence file to the new folder
- ▶ Step 3: Backup the licence file licprotector.lic.
- ▶ Step 4: Install Update Automatic Licence Generator (only if needed). Copy the licprotector.lic file from your backup to the installation folder
- ▶ If you want to use the new installation code 4 with the Web Activation Server copy the AutoLicGenerator.exe from step 4 to the Web Activation Server including the licence file. Otherwise no update for the Web Activation Server is necessary
- ▶ You should never delete an old version of Licence Protector – this allows to create files and keys with old file formats if required

Important Notes

The LicProtector.DLL can be used **without** recompilation of the original application. The CLSID has not changed. The LicProtector.DLL has the ProgID "LicenceProtector23.lpLicprotector23" with CLSID {EBF0095F-B528-4BA5-A2F1-FBBA1E13BF81}.

All programme modifications can be found here:

www.mirage-systems.de/licence-protector/modhistory232.html

New folder ..\files for delivery

This new folder contains the files which can be delivered with the application.

The following files are available:

- ▶ LicProtector.DLL - uncompressed, all functionalities
- ▶ LicProtectorMedium - uncompressed, without Web Activation
- ▶ LicProtectorSmall - uncompressed, without Web Activation and without Licence Viewer

The folder ...**compressed** contains these files in a compressed and encrypted format.

Details can be found in the developer documentation, **chapter 7 Installation and Distribution**.

Documentation

In the main developer documentation, the following chapters have been added or rewritten:

- ▷ Copy Protection – Pros/Cons – starting page 21
- ▷ Installation and Distribution issues – page 35
- ▷ Anti Hacker strategies – page 86
- ▷ Tips, Ideas and How To – page 88
